"Saving up" is an education in itself. Saving up for an education is good training for a child, much better than saving up for the money's sake or for the sake of spending the money on its selfish pleasures.

And you know, if you have children, that it's just as easy to teach—them to save in a good cause as a bad one. Easier, for the child is very quickly interested in a good cause.

You can make the children save up for their own education. The great thing is to get them interested. To a child properly handled such an education is a pleasure, not a task.

The reason children are not, as a rule, interested in their studies is because they are usually given several books on a few subjects. Generally on subjects they are not interested in-subjects in which they are not naturally fitted to excel.

Let a child once find out, however, in what groove its natural talents lie and you will see it bend all its energies in that direction. With a parent's wise help in the proper channel it is bound to be a "cut above the The way to belp is to give fyour child a library that contains information
